

CRITICAL THINKING

DURATION: 2 Days

COURSE OVERVIEW

How many times have you responded too quickly to a message or made a hasty business decision, only to find that you needed to correct yourself later because you didn't think it all the way through? It happens to even the best workers, but having to backtrack and fix these kinds of avoidable mistakes costs you more than your pride — it's a waste of valuable time, all because of lack of critical thinking. Critical thinking is one of the most sought after qualities that employers look for in their employees in any industry. Critical thinking refers to the ability to analyze information objectively and make a reasoned judgment. This process of thinking impacts many areas of our personal and work life. Having good critical thinking eliminates a lot of wastes, increases efficiency, and also manifests a sense of responsibility in that person. This 2-day program clearly outlines on how one can adopt, train and apply critical thinking at their workplace.

TARGET AUDIENCE

- Managers
- Senior Managers
- HR Management

LEARNING OUTCOME

At the end of this training, participants will

- Know what Critical thinking is
